- Simulated lifts can be carried out to determine detailed point loading information

# MERLO SPECIALISTS

## GT Lifting and Merlo stretches back over 20 years.

We have been working with pioneering inventors of equipment such as the ROTO Telehandler (Merlo), for over 20 years and they continue to be our number one partner throughout the GT Lifting business. Working closely together over all aspects of product development, and commercial agreements – GT Lifting Solutions Limited is proud to be Merlo's number one customer within the UK.

### ROTO Telehandler

The Merlo Roto, is equipped with the latest emission engines, while offering the best mechanical, hydraulic, and electronic performance making it the number one choice within the hire and sales industry. Ranging from 18m – 35m and lift capacities of 4t – 7t, GT Lifting and Merlo are sure to have the right machine for you.

### Heavy Lift Telehandler

Ranging from 6t – 12t, these machines have been specifically designed to enhance operational performance levels and to ensure highly effective solutions in all heavy-duty handling operations. Merlo's high performance, heavy lift telehandlers can lift up to 12 tonnes and remain consistently popular with our customers.

# MAGNI SPECIALISTS

The revolutionary Magni ROTO range was introduced to the UK in 2014, and has become a firm favourite on more demanding and technical projects; offering unrivalled high reach Telehandlers such as the 6t/35m, 6t/39m & the 6t/46m.

## ROTO Telehandler

Magni ROTO Telehandlers have a patented load control system that detects the risks of overload during use making them highly safe and reliable. We are proud to run the UK's largest fleet of Magni ROTO Telehandlers; Ranging from 25m – 46m.

## Heavy Lift Telehandler

The Magni Heavy Lift range are suitable for use in the most demanding of environments. Heavy-duty telescopic handlers have a lift capacity of between 10 and 45 tonnes, alongside excellent manoeuvring speed and stability, making them ideal for manufacturing, ports, and mining.

# STANDARD TELEHANDLERS

Merlo telehandlers guarantee maximum movement and precision, thanks to the hydrostatic transmission, which ensures millimetric variations in the machine's movements and load's positioning. Merlo telescopic handlers are compact and lightweight to reduce manoeuvring space and impact on the ground. Merlo telescopic handlers offer the best visibility on the market, ensuring faster and safer operations.
